THERMOFIGHT™

THERMOGENIC WEIGHT LOSS FORMULA†

FREQUENTLY ASKED QUESTIONS

What is ThermoFight?

ThermoFight fires up your metabolism with a naturally based, thermogenic formula that increases thermogenesis in the body.† Capsimax® (derived from the hot pepper plant), Green Tea epigallocatechin gallate (EGCG), and caffeine are the triple-action activators that help maintain optimal levels of thermogenesis.†

Thermogenesis is the process by which the body raises its temperature, or energy output. An increased energy output means the body has to raise its metabolic rate. As a result, the excess calories stored in fat are burned faster and are quickly released from the body as heat.

What are the benefits of ThermoFight?

Capsimax is the active ingredient in ThermoFight that naturally increases thermogenesis.† Derived from the hot pepper plant, Capsimax not only boosts your metabolic rate and increases your energy levels but also curbs your appetite so you eat less and have fewer cravings.† ThermoFight is also fueled by acai berry, an antioxidant-rich “superfood.” Studies show that a diet rich in antioxidants may slow the aging process by neutralizing free radicals.

What are the benefits of Green Tea EGCG and caffeine found in ThermoFight?

The caffeine in ThermoFight comes from Green Tea Leaf extract. Studies have shown that Green Tea can help boost energy. Epigallocatechin Gallate (EGCG), a compound found in Green Tea, has been shown to increase metabolism, slow fat cell development, and increase the body’s fat oxidation rate.

How much caffeine is in ThermoFight?

A complete daily dose of three tablets contains roughly the same amount of caffeine found in one cup of coffee.

What is the recommended dosage?

Adults take one (1) tablet two to three times daily with meals.

Can I take ThermoFight every day?

Yes, ThermoFight is a plant-based product that is formulated for daily use. We recommend you take one tablet two to three times daily with meals.

When is the best time to take ThermoFight?

Take one tablet with your three daily meals. If you are sensitive to caffeine, you may want to avoid taking in the evening or close to bedtime.

Is ThermoFight safe for me to use if I am pregnant, nursing or have an ongoing medical condition?

Before using any new product, whether a nutritional supplement, topical cream or treatment, or any other item, you should always consult your physician to find out if it is safe for you.

Can my children use this product?

ThermoFight is recommended only for adults 18 years old or older.
