OTHER INGREDIENTS

Microcrystalline cellulose, stearic acid, croscarmellose sodium, magnesium stearate, silica, and film coating (hydroxypropyl methylcellulose, titanium dioxide, glycerine, carmine and maltodextrin).

Cream: Water, caprylic/capric triglyceride, Ricinus Communis (Caster Seed) Oil, Progesterone, Pentylene Glycol, Hydrogenated Lecithin, Butyrospermum Parkii (Shea Butter), Glycerin, Squalane, Phyto Estrogen, Ceramide 3

DIRECTIONS

EstroRhythm Supplement:

Women take 1 tablet twice daily as a dietary supplement.

EstroRhythm Cream:

For best results apply Balancing Cream in the morning. Use the entire contents of one packet per day on any area of the body with fatty tissue. Start cream use on the day marked for the day you are at in your cycle and continue regular use going forward. If you are already in menopause, begin on day one, week one and continue regular use going forward. EstroRhythm Balancing Cream should be applied on clean, dry skin and should not be used with other creams.

SUPPORT FOR MENOPAUSAL SYMPTOMS

FREQUENTLY ASKED QUESTIONS

What is EstroRhythm?

EstroRhythm is the world's first naturally based, daily solution for menopausal symptoms. Its superior formulation uses natural ingredients that are safe and effective without the worries associated with synthetic solutions. EstroRhythm is a two-part, daily system that includes a supplement and a premeasured, daily cream application. The supplement provides the nutrients your body needs for balance, and the cream helps protect your body through the outside care of your skin with phytoestrogens. There's no mess and no guess—just Mother Nature's relief for menopause.

What age is recommended to start using EstroRhythm?

EstroRhythm is recommended for perimenopausal, menopausal, and postmenopausal women. You can begin to use the system as soon as you see signs of perimenopause, which can begin as early as age 35.

How do I begin to use EstroRhythm if I am perimenopausal?

If you still have a regular menstrual cycle, begin using day one, week one of the EstroRhythm Balancing Cream on the fourth day of your period and continue regular use going forward.

How do I begin to use EstroRhythm if I have started menopause?

If you seldom or no longer have your menstrual cycle, you may begin using EstroRhythm immediately, starting day one, week one of the Balancing Cream. For all women: Begin using EstroRhythm dietary supplement on the same day you begin using the Balancing Cream, and continue regular use going forward.

Can I take EstroRhythm with my prescription HRT or does it replace it?

EstroRhythm is a natural alternative to synthetic hormone replacement therapy for a woman's unique aging process. EstroRhythm cannot be combined with any other hormone replacement.

Where should I apply the cream?

The Balancing Cream should always be applied to a clean, dry area of skin where fatty tissue is present, such as the inner thigh, stomach, or upper arm. Apply in about a four inch square area.

What time of day should I take EstroRhythm?

The EstroRhythm Balancing Cream is day specific and best if used in the morning. Take two supplements daily. Both can be taken together or use one in the morning and one in the evening. It is recommended you use it in the morning, due to the energy boost you may experience.

Since this is a 28 day system, what do I do on days 29, 30 & 31?

On day 29 you begin again with the day where you last left off. It is recommended that you place a second order along with the first or within two weeks of ordering your first supply so that you won't lose any days.

SUPPORT FOR MENOPAUSAL SYMPTOMS

FREQUENTLY ASKED QUESTIONS CONT.

Why are there 60 supplements instead of 56?

These are bonus supplements. There are four extra per month that can be used if you need additional supplements to help alleviate symptoms. Some women may use them during the third week. A third supplement can be added as needed.

What should I do if I miss a day?

Just begin with the daily dosage you missed and go forward from there.

How soon should I begin seeing results?

Everyone responds differently to EstroRhythm. You can expect to see results almost immediately; however, it could take up to one month or more.

Can I use EstroRhythm with the Skin products?

There is no reason that the products in our Skin line would interfere with EstroRhythm. However, you will want to be certain to clean and dry the skin before applying the cream.

How long can I use EstroRhythm

You can use EstroRhythm for the rest of your life as it is a combination of safe, natural ingredients.

What can I expect if I stop using EstroRhythm?

You will have no negative side effects, but your body will revert to the condition it was in before you began using EstroRhythm.
