### FREQUENTLY ASKED QUESTIONS

#### What is Ultimate ThermoFit?

Ultimate ThermoFit is a naturally based, thermogenic formula that increases thermogenesis in the body. Thermogenesis is the process by which the body raises its temperature, or energy output. An increased energy output means the body has to raise its metabolic rate. As a result, more fat and calories are burned faster to support your higher metabolism and your lean muscle increases faster.

#### What are the benefits of Ultimate ThermoFit?

Capsimax® is the active ingredient in Ultimate ThermoFit that naturally increases thermogenesis. Derived from the hot pepper plant, Capsimax not only boosts your metabolic rate and increases your energy levels but also curbs your appetite so you eat less and have fewer cravings. Ultimate ThermoFit is also fueled by acai berry, an antioxidant-rich “superfood.” Studies show that a diet rich in antioxidants may slow the aging and disease process by neutralizing free radicals.

#### What is the recommended dosage?

Take two to three tablets daily with meals or just before.

#### Can I give Ultimate ThermoFit to my children?

Ultimate ThermoFit is designed for adult use and is not recommended for children. Always consult your pediatrician before giving any supplements to children.

#### Can I take Ultimate ThermoFit if I am pregnant or nursing?

We suggest that you consult your physician prior to using any of our products if you are pregnant or nursing.
