ESSENTIAL DIFFUSER

SIT BACK AND JUST BREATHE!

Sit back and just breathe! It's that easy to enjoy your It Works! Essential Oils anytime and anywhere with the Essential Diffuser.

It's an aroma diffuser, atomiser, and humidifier all in one, dispersing water and essential oils into the air as a cool, ultra-fine mist. Powered by ultrasonic technology, the Essential Diffuser uses high frequency electrical vibrations to diffuse water and essential oils without heating, ensuring the oils retain all of their natural properties for you to breathe in!

The USB power source makes it easy for you to take the Essential Diffuser anywhere, from home to the office. It's compact and whisper quiet with up to 2.5 hours of essential oil diffusion time.

Just plug in the Essential Diffuser to experience the aromatherapy of It Works! Essential Oils.

- Ultrasonic technology disperses water and essential oil without heating, maintaining the oil's natural properties
- Ultra-fine mist reaches an area of 18 square meters
- USB power source plugs into PC and mobile power stations
- 50 ml size is portable and convenient
- Up to 2.5 hours of essential oil diffusion time
- Whisper quite 3MHz frequency

DIRECTIONS

1. Place the Essential Diffuser upright on a firm, level surface and remove the upper cover.
2. Fill the Essential Diffuser with 50 ml of water, use the "MAX" line as a guide and do not overfill.
3. Add 2-3 drops of essential oil to the water in the Essential Diffuser and replace the upper cover.
4. Connect the power cord to the Essential Diffuser and plug the power cord into a USB outlet (mains power adapter is not included).
5. Press the power button once to turn on the Essential Diffuser; press the power button again to turn it off.

Keep out of reach of children and pets. Clean regularly.

CAUTIONS

- Keep out of reach of children and pets. Take care to keep the cord clear of pathways, it should not be pulled at any point or the Essential Diffuser could tip over. Do not move the unit while it is in use.
- Essential oils can stain. In the event of a spill, immediately clean up with a soft cloth.
- The ultrasonic vibration plate located in the tank is very sensitive. It should not be touched except with a cotton ball during cleaning, other materials or excessive force will damage it.
- Do not overfill the Essential Diffuser. Doing so may cause water to collect inside the unit and damage it.
- Keep the Essential Diffuser away from electronic equipment and other surfaces and items sensitive to water. The mist produced could condense on these items and damage them.
- Pour out any water left in the Essential Diffuser after use. Standing water could attract mold and mildew.
- If smoke or a burning smell is detected, unplug the unit immediately.

Keep out of reach of children and pets. Clean regularly.

ESSENTIAL DIFFUSER

SIT BACK AND JUST BREATHE!

FREQUENTLY ASKED QUESTIONS

What is the Essential Diffuser?

Sit back and just breathe! It's that easy to enjoy your It Works! Essential Oils anytime and anywhere with the Essential Diffuser. This aroma diffuser, atomiser, and humidifier all in one disperses water and It Works! Essential Oils into the air as a cool, ultra-fine mist. Powered by ultrasonic technology, the Essential Diffuser uses high frequency electrical vibrations to diffuse water and essential oils without heating, ensuring the oils retain all of their natural properties for you to breathe in!

Just plug in the Essential Diffuser to experience the aromatherapy of It Works! Essential Oils.

How do I use the Essential Diffuser?

The Essential Diffuser allows you to enjoy your It Works! Essential Oils aromatically anytime and anywhere. Fill the Essential Diffuser with 50 ml of water. Add 2-3 drops of the It Works! Essential Oils of your choice to the water in the Essential Diffuser. Replace the upper cover and press the power button. Just breathe as the ultra-fine mist fills the room!

Is the Essential Diffuser portable?

Yes, the USB power source plugs into PC and mobile power stations, making it easy for you take the Essential Diffuser anywhere, from home to office. Just make sure the Essential Diffuser is empty before taking it on the go to avoid any spillage.

Why should I use the Essential Diffuser with the It Works! Essential Oils?

Diffusing the It Works! Essential Oils aromatically provides a long lasting aroma that fills the room!

How should I clean/maintain the Essential Diffuser?

You should clean the Essential Diffuser every 5-6 times it is used or before any extended period of inactivity. To clean the unit:

1. Unplug the power cord from the base of the unit and pour out any remaining water in the tank.
2. Wipe out the tank with a soft cloth. Avoid the Ultrasonic Vibration Plate area which should be gently wiped with a cotton ball.
3. Residue that cannot be wiped off can be removed with a citric acid cleaner. Add one tablespoon (15 ml) of cleaner to the tank and fill to the "MAX" line with water. Allow this solution to sit for five minutes and then pour out. Wipe the tank with a soft cloth and then allow the unit to air dry. NEVER use other acids, enzymes, or detergents to clean the unit as they could react with the essential oil residue and cause harmful vapors to be released!

ESSENTIAL DIFFUSER TROUBLESHOOTING GUIDE

PROBLEM/ISSUE	POSSIBLE CAUSES	SOLUTIONS
Will not switch on, switches off early, or will not turn on	<ul style="list-style-type: none"> • Is there enough water in the tank? • Is the power cord connected properly? 	<ul style="list-style-type: none"> • Add water to the tank if needed. • Disconnect cables and re-connect carefully. • Try using a different USB port.
No mist or abnormal mist	<ul style="list-style-type: none"> • Is there not enough water? • Is there too much water? • Is the cover installed properly? • Is there dirt on the air suction port on the underside of the base? 	<ul style="list-style-type: none"> • Add water to the tank. • Water must never be filled over 50 ml (MAX) line. • Remove the cover and reinstall correctly so mist can be released freely. • Clean the air suction port of any dust, as restricted airflow will affect mist. • Use only the recommended amount of It Works! Essential Oils as too much will reduce or completely prevent mist from forming.
Water leakage from product	<ul style="list-style-type: none"> • Is the cover installed properly? • Has the diffuser been tipped over? • Is the temperature low or the humidity high? 	<ul style="list-style-type: none"> • Remove the cover and reinstall correctly so mist can be released freely. • Follow the accidental leakage instructions in the User Manual. • Under these conditions, the mist may condense quickly into water droplets and is not a defect of the diffuser.

- Excessive condensation is covered in the User Manual as a possibility and is not a defect. Environments with a low temperature or a high humidity will cause the mist to condense quickly into water droplets and is why the user manual cautions against using the diffuser on or around surfaces that could be damaged by water.
- Water type, room humidity, temperature and air currents can all affect the amount and intensity of the mist produced by the Essential Diffuser. It is not unusual for the amount of mist and running time to vary.

- The Essential Diffuser will not work without water. Pressing the power button without enough water in the tank will cause the power light to flash three times to remind you to add water. If the tank already contains enough water and the light still blinks, gently tap the Essential Diffuser as there could be an air bubble stuck over the sensor in the unit.
- If the “MAX” line sticker comes off the tank of the Essential Diffuser, fill the tank with water up to a quarter inch from the top of tank.
- Please carefully read the Essential Diffuser User Manual before use.

Keep out of reach of children and pets. Clean regularly.

It is illegal for a promoter or a participant in a trading scheme to persuade anyone to make a payment by promising benefits from getting others to join a scheme. Do not be misled by claims that high earnings are easily achieved.
